

BEKINS

4.20.21

As many of you know, home appliance availability has been a growing challenge due to a severely interrupted supply chain. Raw material shortages, production constraints, port congestion, and natural disasters impacting key component suppliers have compounded to cause unprecedented lead times and unpredictable arrival dates in the appliance industry.

In this season of scarcity, three major factors can positively determine the stock level of an appliance retailer like Bekins:

- 1) Long-term relationships with suppliers and an understanding of their ordering systems to quickly secure product as it becomes available
- 2) A favorable cash position that allows for large quantity purchases
- 3) The space to store those products safely, without risk of damage

Bekins is well positioned in each of these areas, thanks to 46 years of industry experience and proactive planning. The result is over 1,200 in stock products across various brands and price points available for immediate pickup, scheduled drop off, and professional installation.

Bekins in-stock appliance inventory includes:

95 dishwashers
283 washers
253 dryers
142 ranges
241 refrigerators
159 microwaves
26 undercounter & wine units
20 freezers

If you or a client need appliances in any of these categories, please reach out to our brand ambassador Jennifer at jennifer.toscano@bekins.us, or call her at (616) 502-5025. We'll be happy to see if we have what you're looking for in stock, and if we don't, hopefully provide you with a comparable in-stock option.
